Designer: Eunah Kang

Discussion Points / Topics

1. Content

What's working well:

- Love the big image for the front page
- love how the "Tracklists" pages have both lyrics and music video screenshots(if available)

Other suggestions for improvement / need to complete:

- for the "More Songs" section, just add the rest of the solo songs Jungkook has
- add platform links / play button for viewers to click and play songs while scrolling through the "Tracklists" and "More Songs" pages

2. Structure

Other suggestions for improvement / need to complete :

- navigation text need to change color, no blue, no underline
- navigation bar might need a background color
- for the "More Songs" section's navigation bar, be uniform with the Track Lists'

3. Aesthetic

What's working well:

- really nice background colors for tracklist pages

Other suggestions for improvement :

- try to look for a more similar fonts (for the title "Golden") with the one on the album
- navigation bar's fonts can be smaller
 - try to put a background color for the navigation bar so it does not cover other body paragraphs
