Discussion Points / Topics

Concept

- Concept is well delivered through uniform font and color palettes. I really like how the song titles are arranged in the Mockup A. The way they are arranged reminds me of music playlists, which is something we aim for.
- Consider combining Mockup B's Homepage (particularly the big image on the top with text "Golden") with Mockup A's.
-

q2Structure

- combine Home and About page
- "hide" and "show" bottom for the song title section

Aesthetic

- use the fonts from Mockup B
- for "Standing Next To You" page, do a different color palette by choosing colors from the music video
- for other song pages, either stick with the original color palette (Yellow & Golden), or colors that come to mind while listening to the song
